THE IRON CROWN DIVIDE MINES COMPANY

Incorporated under the laws of the State of Nevada, for 1,500,000 shares, par value Ten Cents, 750,000

shares in the Treasury

Offers a Block of 100,000 Shares of Its Treasury Stock at

12 1-2c per share

to the public for subscription. The Company has a

lying as it does about one and one-half miles southeasterly from the Rosetta Divide, and about the same distance southwesterly from the Ben Hur, and less than three-quarters of a mile from the Gypsy Claim, now incorporated under the name of the Goldsmith Divide.

The Gypsy was considered such a good mining prospect by the well-known and successful mining man, Ownie Dougherty, who was one of the pioneers of Tonopah, and one of the successful leasers on the famous Mizpah Mine, in Tonopah, that about the latter part of 1909 Ownie Dougherty and associates secured a lease on the Gypsy, when silver was worth only fifty cents per ounce.

They opened up a very promising vein on the surface in a short time and took out considerable ore from shallow surface workings. Then they started a cross-cut tunnel to cut at greater depth the vein opened by surface workings, and had they continued on to the vern, in the opinion of an able engineer of wide experience, there would have been exposed a body of ore that would have precipitated the Divide boom years earlier.

THE RICH STRIK

at Ellendale started Dougherty and his associates for the new Eldorado and for the time being the Gypsy was forgotten, and the owner of the Gypsy refused to renew the neglected lease. The Gypsy has now changed hands, and the new owners, under the name of the Goldsmith Divide, have refused several offers from leasers and are preparing to open up work on a large scale. There is a rumor that the dominant interests of the camp are negotiating a deal for the control of the Goldsmith Divide.

not only has the Gypsy ledge system cutting through its property, but it has an intersection of northeast and southwest veins crossing the famous Gypsy vein.

There is also undoubtedly an intersection of the Tonopah Divide vein system and the Gypsy vein system on the Iron Crown claim of the IRON CROWN DIVIDE MINES COMPANY, in the opinion of the directors of the company and of prominent engineers.

They Have Property of Great Potential Value

and we have no doubt that the company will open ore bodies on this property of great dividend-paying capac. ity. The company plans

An Aggressive Development Policy

and sinking will be commenced at the intersection of the two veins that show contact of Divide breccia and and esite, and is in direct line with the course of the famous Tonopah Divide ledge from the northwest to the southeast, and an early application for

LISTING THE IRON CROWN DIVIDE STOCK

on the exchanges of the country will be made
